

CAVIX

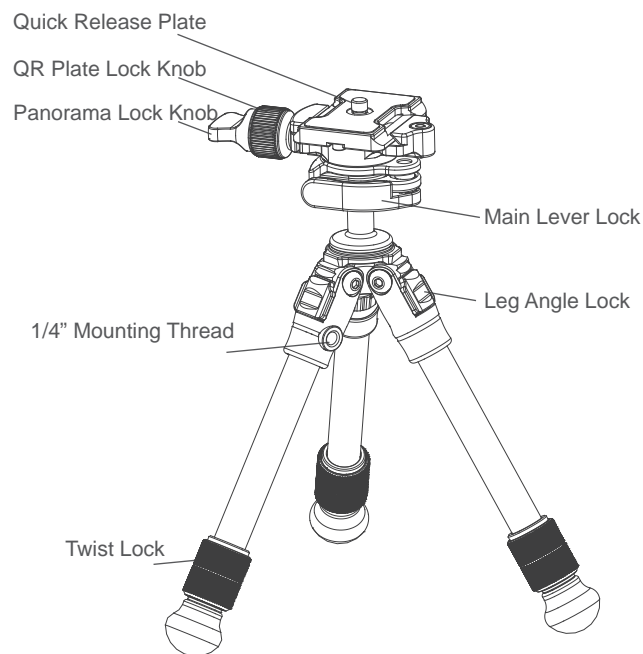

User Manual

Carbon Fiber Tabletop Tripod
Model # W-132F0C

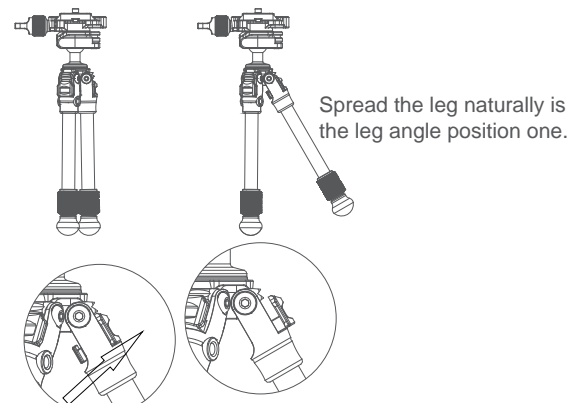

Thanks for purchasing **CAVIX** tabletop tripod,
please read the user manual before operation.

Key Features

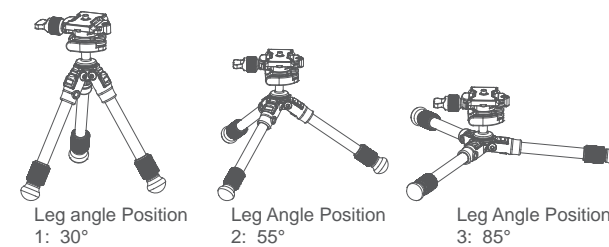

Leg Angle Adjustment

For stable support when shooting on an uneven surface,
or for low-angle shots, each leg can be adjusted to 3 preset
angles. To set the leg angle:

- 1.Close the leg slightly towards the center/inside.
- 2.Lift or press inside out the angle adjustment lock as per photo above.
- 3.Set the angle of the leg to one of the three preset positions.
- 4.Press in the leg angle lock button to secure the leg at the desired angle.

⚠ During this procedure, please take care not to insert your
fingers inside the central aperture on the spider collar.
